

Bouncy Paper Plate Spider

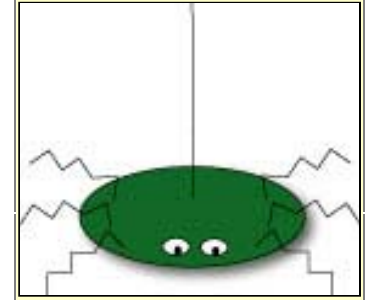

<i>What you'll need:</i>	1 paper plate 2 google eyes 6 pipecleaners	string or a long elastic band paint & brush glue	adhesive tape scissors or a hole punch
--------------------------	--	--	---

Instructions

1 Put the plate upside down.

2 Put a hole in the centre of the plate.
Put 3 holes along the edge of the plate on both the left and the right sides (for the legs).

3 Paint your spider on both the top and bottom of the plate to make it as scary as you like.

4 Glue on the google eyes so that there are three holes on either side of them.

5 Bend your pipecleaners in zigzags or spirals to make the spider's legs.

6 Poke a pipecleaner from the top to the bottom of one of the holes.
Bend the end of the pipecleaner under the plate to keep it in place (this is a leg).
Repeat for all six pipecleaner legs.

7 Put a string through the hole in the centre of the paper plate.
Tape the string in place under the plate
An elastic can replace the string to make an extra bouncy spider!

8 Hang your spider and enjoy!
